Dear Mr. York:

Subject: UIC Permit No. UTU-19AP-1C3C2E8
Notification of Intent to Drill New Extraction Well (Well 39H): **DWQ Approval**

On April 4, 2012, the Division of Water Quality received a Notification of Intent to Drill New Extraction Well (Well 39H). The well will be completed into the Sylvite 9 formation. Once in contact with the Sylvite 9 formation there will be as many as four laterals off this well. The plans for well 39H have been reviewed and are hereby approved.

On January 23, 2012 DWQ approved two core holes 38C and 39C and a new well 37H. Based on the information obtained from the drilling of core hole 38C and well 37H, Intrepid has decided not to drill core hole 39C. This change has been noted.

The letter also refers to the next well to be drilled (40H). The letter did not contain a well schematic or location drawings. Therefore, that information must be submitted before approval can be issued.

If you have any questions about this letter please contact me at (801) 536- 4353 or wwcampbell@utah.gov.

Sincerely,

Woodrow Campbell, P.E.
